

5/6 Visual Arts students are weaving maniacs! Inspired by early civilizations, we are learning how to create a loom, warps and wefts. Our students have created a small wallet/pouch and are now making beautiful wall hangings of mixed media. We are also creating radial design drawings inspired by native American designs.

7/8 Visual Arts students are experiencing production line art. Inspired by the time period of colonization to industrialization, we have been learning how to reproduce a piece many times. Plates, mugs and silkscreen designs are exploding from our room. Students are gaining an understanding of High Art, Craft and Folk Art. Many of these pieces will be sold at The Gala Boutique!
